Introduction

Introduction to your 2020-21 team

Jon Roberts

Engagement Lead

T 0117 305 7699

E Jon.Roberts@uk.gt.com

David Bray

Engagement Senior Manager

T 0117 305 7889

E David.Bray@uk.gt.com

This paper provides the Audit Committee with a report on progress in delivering our responsibilities as your external auditors.

The paper also includes:

- a summary of emerging national issues and developments that may be relevant to you as a local authority; and
- includes a number of challenge questions in respect of these emerging issues which the Committee may wish to consider (these are a tool to use, if helpful, rather than formal questions requiring responses for audit purposes)

Members of the Audit Committee can find further useful material on our website, where we have a section dedicated to our work in the public sector. Here you can download copies of our publications www.grantthornton.co.uk

If you would like further information on any items in this briefing, or would like to register with Grant Thornton to receive regular email updates on issues that are of interest to you, please contact either your Engagement Lead or Engagement Manager.

We are pleased to introduce your 2020-21 engagement team, led by Jon Roberts. Jon leads Grant Thornton's local public audit relationships with a number of external bodies, including FRC, Public Sector Audit Appointments Ltd, the National Audit Office, DCLG and CIPFA. Jon is currently Head of Grant Thornton's South West local audit practice and is an engagement lead for a number of large local audited bodies in the South West and nationally, including Birmingham City Council, Bristol City Council, North Somerset Council and NHS BNSSG CCG UK.

Your engagement team Senior Manager is David Bray. David is an experienced Senior Manager in the Public Sector Assurance team who joined the Audit Commission in 1993. David is Grant Thornton's Public Sector (PS) International Lead which involves liaising with other Member Firms to ensure there is a global understanding of the challenges faced by the public sector & the responses being developed, and implementing the Firm's global Public Sector Strategy.

Progress at February 2021

Financial Statements Audit 2019/20

We reported our work in the Audit Findings Report and gave our opinion on the Statement of Accounts on 18 November 2020.

Value for Money 2020/21

The NAO consultation on a new Code of Audit Practice (the "Code") has finished, and the new Code has completed its approval process in Parliament. It therefore came into force on 1 April 2020 for audit years 2020/21 and onwards. The new Code supersedes the Code of Audit Practice 2015, which was published by the National Audit Office (NAO) in April 2015.

The most significant change under the new Code is the introduction of an Auditor's Annual Report, containing a commentary on arrangements to secure value for money and any associated recommendations. The NAO public consultation ran until 2 September 2020. The NAO will now analyse all consultation responses received and consider what changes are required to the draft guidance.

Financial Statements Audit 2020/21

Our planning procedures for the 2020/21 audit are underway for the financial statements and Value for Money work.

Our work will be summarised in the Audit Plan which will be taken to the next Audit Committee.

Audit Fees

Following the review of audit fees in 2019/20 and the outcome of the Redmond Review, the audit fees for 2020/21 are currently being considered and will be communicated to the Audit Committee in due course within the External Audit Plan. As a firm, we are absolutely committed to meeting the expectations of the FRC with regard to audit quality and local government financial reporting.

Other areas

Meetings

We meet with Finance Officers regularly as part of our quarterly liaison meetings and continue to be in discussions with finance staff regarding emerging developments and to ensure the audit process is smooth and effective.

Events

We provide a range of workshops, along with network events for members and publications to support the Authority. Your officers are due to attend our Financial Reporting Workshop in February, which helps to ensure that members of your Finance Team are up to date with the latest financial reporting requirements for local authority accounts.

Further details of the publications that may be of interest to the Authority are set out in our Sector Update section of this report.

Audit Deliverables

2019/20 Deliverables	Planned Date	Status
<p>Fee Letter</p> <p>Confirming audit fee for 2019/20.</p>	February 2020	Complete
<p>Audit Plan</p> <p>We are required to issue a detailed audit plan to the Audit Committee setting out our proposed approach in order to give an opinion on the Authority's 2019-20 financial statements and a Conclusion on the Authority's Value for Money arrangements.</p>	February 2020	Complete
<p>Audit Findings Report</p> <p>The Audit Findings Report was reported to the October Audit Committee.</p>	October 2020	Complete
<p>Auditors Report</p> <p>This is the opinion on your financial statement, annual governance statement and value for money conclusion.</p>	November 2020	Complete
<p>Annual Audit Letter</p> <p>This letter communicates the key issues arising from our work.</p>	February 2021	Complete
2020/21 Deliverables	Planned Date	Status
<p>Fee Letter</p> <p>Confirming audit fee for 2020/21.</p>	February 2021	In progress
<p>Audit Plan</p> <p>We are required to issue a detailed audit plan to the Audit Committee setting out our proposed approach in order to give an opinion on the Authority's 2020-21 financial statements and a Conclusion on the Authority's Value for Money arrangements.</p>	March 2021	In progress

COVID-19 Update

Impact on working arrangements:

- Following the government's announcement on Monday 16 March 2020, we closed our Grant Thornton offices. Many have now re-opened, but with a significantly reduced capacity. All of our people are still working from home for the majority of the time.
- It is likely that we will work remotely during the majority of your accounts audit. Although there are some audit tasks which are best undertaken in person, we will be able to complete the majority of the audit remotely. This is however likely to make the audit process longer. We continue to work closely with your finance team to make this different way of working as efficient as possible.
- There may need to be further changes to planned audit timings due to potential illness within the audit team or the finance team and due to the further developments of COVID-19.

Impact on accounts and audit opinions:

There are a number of key issues which your finance team will have had to consider as part of the year end closedown and accounts production:

- impact on reserves and financial health and whether the Authority needs to provide additional disclosures that draw attention to a Material Uncertainty around Going Concern or asset valuations.
- impact on post-balance sheet events. The consequences of the virus post 31 March 2020 will generally be non-adjusting post balance sheet events but some form of disclosure will be needed.
- disclosure of impact in narrative report.
- disclosure of critical judgements and material estimation uncertainties.
- impact on the content of the Annual Governance Statement, particularly with regards to risks, controls and mitigation.
- considerations in respect of service continuity and disaster planning arrangements (this could impact on the VfM conclusion).
- impact on reporting to those charged with governance and signing arrangements.

Changes to reporting requirements:

- the Secretary of State announced that for the 2019/20 accounting period he would be extending the period for publication of principal authority accounts to 31 August 2020.
- for principal authorities, this meant that the whole chain of publication requirements was amended. The audited financial statements were now to be published by 30 November 2020.
- IFRS 16 implementation has been delayed by 1 year to 1 April 2021. The implementation timetable has not yet been released.

Covid-19 update – Grant Thornton

Where are we now?

Almost twelve months into lockdown and Authorities have moved from the initial emergency response phase to focus on recovery planning which is running in parallel with on-going responses to the pandemic, such as supporting vulnerable people, and managing the capacity challenges of delivering business as usual alongside covid-19 response.

As place leaders, Authorities are managing the conflict between revitalizing footfall in high streets and keeping people safe, with some leading by example and encouraging Council officers to spend some of the week in Council offices. Of particular interest to WECA, use of public transport as a key mode of travel to get to work remains a challenge.

Lessons learned

All organisations have been reflecting on the lessons learned from the pandemic, and are seeking to maintain the positive experiences as well as learn from the challenges, as part of recovery planning. There is a recognition that technology has enabled many people to successfully work remotely, and that this will have a fundamental impact on working patterns well after Covid-19 has passed. Some Councils are reviewing their property portfolios to understand the changes required in terms of future usage patterns, including how Councils interact with their communities, whether parts of the municipal estate should be disposed, and whether alternate use of space can support income generation.

There will be demographic variations between places, meaning there is no “one size fits all” to economic recovery. For example, home to work geographies will vary, with some people who previously commuted into a Council area for their work may now be considering office space closer to home, leading to a rise in demand for shared office space in some areas, that will in part counteract the fall in demand elsewhere.

Lessons Learned (Cont'd)

Many Councils have recognized the improvement in community engagement and partnership working with the voluntary sector and other public sector organisations during the pandemic and are seeking to build on this, with a recognition that sharing responsibility for place-based recovery plans can help sustain the improvements gained. Although a shared view of place-based recovery takes an investment of time and resource that not all partner organisations are able to provide.

Many Authorities understand the importance of data in supporting recovery planning decision making, to effectively understand where to prioritise resources and activity in the right way and at the right time to achieve the right outcomes.

The future?

Covid-19 has only increased volatility and uncertainty for local government, and when working with Councils delivering Financial Foresight we have prioritized scenario planning to support strategic financial planning. Understanding best, worst and optimum case scenarios from the impact of the pandemic are critical in strategic discussion when setting next year’s budget and updating the Medium-Term Financial Plan – impacts on the place and communities, as well as on the Council services and the Council as an organization. Some Authorities are more confident than others in being able to manage their financial position during 2020/21 but all are concerned about 2021/22 and beyond.

As already noted, places will vary depending on their socio-economic and demographic characteristics, but all Authorities are working through demand impacts arising from the ongoing pandemic and the associated recession, and ensuring their workforce continue to be supported to ensure they remain personally resilient.

Local government has always demonstrated a remarkable resilience in managing significant challenges, including ten years of austerity, and being at the forefront of the pandemic response. And whilst much uncertainty remains, we are confident that Authorities will continue to demonstrate the capacity to lead places, deliver services.

Scenarios and hypotheses

Local authority areas in 12-24 months?

Theme	Reasonable worst case	Reasonable best case
People & community	 <ul style="list-style-type: none"> • Multiple lockdowns and ongoing disruption • Community dependency and expectation of sustained response • Turbulence and activism within the VCS • Socio-economic inequality is compounded • Failure of leisure and cultural services 	<ul style="list-style-type: none"> • Smooth exit from lockdown to a “new normal” • Community mobilisation is channelled into ongoing resilience • Strengthened VCS relationships and focus • Systemic response to inequality is accelerated • Leisure and cultural services adapted to social distancing
Business & economy	 <ul style="list-style-type: none"> • 16% reduction in GVA for 2020 based on OBR reference scenario • Slow / uneven economic recovery and “long tail” on unemployment • Central gov / BEIS focus investment on areas furthest behind • Loss of tourist & student spend causes unmitigated damage • 'V' shaped recovery results in 2-3 year recovery period 	<ul style="list-style-type: none"> • 5-10% reduction in GVA • Rapid economic recovery with employment levels close behind • Central government “back winners” with investment • Adaptation allows resumption of tourist and student economy • Business base is weighted towards growth sectors
Health & wellbeing	 <ul style="list-style-type: none"> • Increased demand and escalating need due to fallout from lockdown • Newly-vulnerable cohorts place strain on the system • Unit costs increase further as markets deteriorate and providers fail • SEND transport unable to adapt to social distancing • Imposed disruption of care system 	<ul style="list-style-type: none"> • Positive lifestyle changes and attitudes to care reduce demand • Needs of newly vulnerable cohorts met through new service models • New investment in prevention and market-shaping manage costs • New ways of working leading to stronger staff retention • Locally-led reform of health and care system
Political & regulatory	 <ul style="list-style-type: none"> • Local government side-lined by a centralised national recovery effort • Unfunded burdens (e.g. enforcement and contact-tracing) • Councils in the firing line for mismanaging recovery 	<ul style="list-style-type: none"> • Local government empowered as leaders of place-based recovery • Devolution and empowerment of localities • Councils at the forefront of civic and democratic renewal
Environment	 <ul style="list-style-type: none"> • Opportunity missed to capture and sustain environmental benefits • The end of the high street / town centres • Emissions and air quality worsened by avoidance of public transport • Capital programmes stuck 	<ul style="list-style-type: none"> • Ability to invest in transport modal shift and green infrastructure • Changed working patterns rejuvenate town centres • Sustained impact on emissions due to new behaviours • New, shovel-ready infrastructure programmes
Organisational	 <ul style="list-style-type: none"> • Inadequate funding forces fiscal constraint • Working practices return to status quo – increased operating costs • Imposed structural change within the place • Austerity 2 • Commercial portfolio becomes a liability 	<ul style="list-style-type: none"> • Adequate funding enables a programme of targeted investment • Learning and adaptation to new operating environment • Energised system-wide collaboration and reform • Fiscal reform and civic renewal • Commercial portfolio reshaped for economic and social gain

What strategy is needed in response?

From response to recovery

Learn, adapt and prioritise

- Develop and test hypotheses around impact on place, services, operations, finances
- Design rapid interventions - implement, test and evaluate
- Learning from the response to lock in the good stuff – reflection on operations, services and the system
- Set priorities and principles – what is the Authority's purpose in an uncertain context and where will it focus?

Mitigating the worst case

Consolidate and build resilience

- Ensure that emergency management and response structures are resilient for the long haul
- What is the minimum operating model to deliver this?
- Predict and model demand for social care and assess care market vulnerability
- Contingency plans for structural disruption
- Re-evaluate infrastructure pipeline

Steering towards the best case

Invest in renewal

- Programme of priority-based investment framed by recovery and renewal
- Focus on inequality, community resilience, targeted economic stimulus, skills and employment support and adapting public spaces
- Continued system leadership, pushing for positive reform and resilience

In-depth insight into the impact of Covid-19 on financial reporting in the local government sector for 2019-20 and ongoing impact into 2020-21

In June Grant Thornton published a report to help officers and elected members identify points they should consider when assessing and reporting the impact of Covid-19 on their authority for the 2019-20 financial reporting period. Each authority will be impacted in different ways and will need to make their own assessment of the impact on their financial statements. However, the report identified some of the key challenges for the sector ongoing into 2020-21, along with the potential financial reporting and regulatory impact, to support preparers of local authority accounts navigate through some of these key issues. The report also included a number of useful links to other resources.

The extraordinary events we are living through follow a decade of austerity, triggered by the financial crisis of 2008/09, which had already placed considerable strain on local authorities' finances. Increased demand for many local public services, directly related to the outbreak of the virus, has placed immediate pressure on authorities' cash flows and expenditure budgets. The longer-term consequences of recession and unemployment on demand for services have yet to be experienced.

At the same time, several important sources of local Council income been subject to reduction or suspension. This perfect storm of conditions presents a real threat to the financial sustainability of the sector. Now, more than ever, strong political and executive leadership is needed to re-establish priorities, review strategies and medium-term financial plans and ensure that public funds are being used as efficiently and effectively as possible. A balance has to be struck between responding to the needs of residents and businesses in a timely manner, protecting the most vulnerable and ensuring appropriate measures and controls around financial management are in place to mitigate against future 'financial shock'. In doing so, iterative scenario planning will help officers and elected members to take informed decisions at key stages, revisiting and revising plans along the way.

The report considered:

- Operational challenges and the related financial reporting/regulatory impact
- Government support schemes – considering the accounting implications
- Significant financial reporting issues to consider
- Other sector issues and practicalities to consider
- Impact on audit work/external scrutiny process
- Engagement with experts

In terms of key financial reporting considerations for 2019/20, consideration should be given to:

Information published with accounts

- Does the Narrative Report reflect the urgency of the situation, the changes to services as a result of lockdown, the partnership arrangements in place, the impact of the pandemic on income and expenditure and possible future scenarios, the impact on savings programmes, treasury management, medium term financial plans and the Authority's communications strategy (noting this is not an exhaustive list)?
- Does the Annual Governance Statement reflect significant developments between 31 March 2020 and the finalisation of the accounts? Does the AGS describe emergency governance arrangements for decision making, the postponement of elections, the transition to virtual meetings and plans for the return to normal democratic processes?

Impairment of receivables

- IFRS 9 *Financial Instruments* introduced an expected credit loss model for financial assets which drives earlier recognition of impairments. Has the Authority assessed the impact of the pandemic on its expectation of credit losses?
- Impairment of statutory Council Tax and Non-domestic rate debtor balances is also possible. Has the Authority observed a measurable decrease in estimated future cashflow, for example an increase in the number of delayed payments? Has the Authority considered whether recent historical loss experience across aged debt may also need revision where current information indicates the historical experience doesn't reflect current conditions? Experience following the 2008/09 financial crisis may prove to be a useful reference point, given the ensuing recession conditions.

Events after the reporting period

- By 31 March 2020 enough was known about the pandemic for accounts preparers and market participants to reflect and, if necessary, adjust assumptions and assessments. By the end of March 2020, it would be extremely difficult to say that the pandemic was not an event that existed and therefore any accounting impact that occurred after this date is not an adjusting event.
- Has the Authority distinguished between subsequent events that are adjusting (i.e. those that provide further evidence of conditions that existed at the reporting date) and non-adjusting (i.e. those that are indicative of conditions that arose after the reporting date)? Has the Authority got arrangements in place to assess events up to the date the final accounts are authorised for issue?

Sources of estimation uncertainty

Has the Authority identified the assumptions required about the future and estimates at the end of the current reporting period that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year? Have these been appropriately disclosed in accordance with the requirements of IAS 1 paras 125-133?

2019/20 financial statements are being prepared in an environment of heightened uncertainty as a result of the pandemic and the situation is evolving and fast moving. We have drawn out some of the key considerations for local Council financial reporting here, but further details can be found in our full report available on the Grant Thornton website:

<https://www.grantthornton.co.uk/globalassets/1.-member-firms/united-kingdom/pdf/publication/2020/impact-of-covid19-on-financial-reporting-local-government-sector.pdf>

Guide for Audit and Risk Committees on Financial Reporting and Management during COVID-19 – National Audit Office

In June the National Audit Office (NAO) published a guide that “aims to help audit and risk committee members discharge their responsibilities and to examine the impacts on their organisations of the COVID-19 outbreak. It is part of a programme of work undertaken by the NAO to support Parliament in its scrutiny of the UK government’s response to COVID-19.”

The NAO report notes “Audit and risk committees are integral to the scrutiny and challenge process. They advise boards and accounting officers on matters of financial accountability, assurance and governance, and can support organisations, providing expert challenge, helping organisations focus on what is important, and how best to manage risk.

Each organisation will have existing risk management processes in place, but risk appetite may have changed as a result of COVID-19, for the organisation to operate effectively and respond in a timely manner. This may result in a weakening of controls in some areas, increasing the likelihood of other risks occurring. Organisations will need to consider how long this change in risk appetite is sustainable for.”

The NAO comment “This guide aims to help audit and risk committee members discharge their responsibilities in several different areas, and to examine the impacts on their organisations of the COVID-19 outbreak, including on:

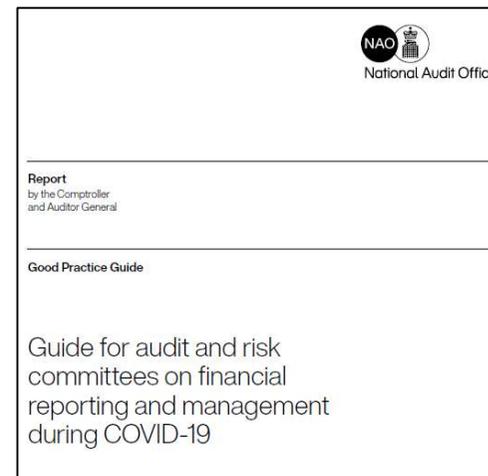

- annual reports;
- financial reporting;
- the control environment; and
- regularity of expenditure.

In each section of the guide we have set out some questions to help audit and risk committee members to understand and challenge activities. Each section can be used on its own, although we would recommend that audit and risk committee members consider the whole guide, as the questions in other sections may be interrelated. Each individual section has the questions at the end, but for ease of use all the questions are included in Appendix One.

The guide may also be used as organisations and audit and risk committees consider reporting in the 2020-21 period.”

The full report can be obtained from the NAO website:

<https://www.nao.org.uk/report/guidance-for-audit-and-risk-committees-on-financial-reporting-and-management-during-covid-19/>

Sector Update

Authorities continue to try to achieve greater efficiency in the delivery of public services, whilst facing the challenges to address rising demand, ongoing budget pressures and social inequality.

Our sector update provides you with an up to date summary of emerging national issues and developments to support you. We cover areas which may have an impact on your organisation, the wider local government sector and the public sector as a whole. Links are provided to the detailed report/briefing to allow you to delve further and find out more.

Our public sector team at Grant Thornton also undertake research on service and technical issues. We will bring you the latest research publications in this update. We also include areas of potential interest to start conversations within the organisation and with audit committee members, as well as any accounting and regulatory updates.

The Redmond Review

The Independent Review into the Oversight of Local Audit and the Transparency of Local Authority Financial Reporting – “The Redmond Review” was published on 8 September.

The review has examined the effectiveness of local audit and its ability to demonstrate accountability for audit performance to the public. It also considered whether the current means of reporting the Authority’s annual accounts enables the public to understand this financial information and receive the appropriate assurance that the finances of the authority are sound.

The Review received 156 responses to the Calls for Views and carried out more than 100 interviews. The Review notes “A regular occurrence in the responses to the calls for views suggests that the current fee structure does not enable auditors to fulfil the role in an entirely satisfactory way. To address this concern an increase in fees must be a consideration. With 40% of audits failing to meet the required deadline for report in 2018/19, this signals a serious weakness in the ability of auditors to comply with their contractual obligations. The current deadline should be reviewed. A revised date of 30 September gathered considerable support amongst respondents who expressed concern about this current problem. This only in part addresses the quality problem. The underlying feature of the existing framework is the absence of a body to coordinate all stages of the audit process.”

Key recommendations in the report include:

- Scope to revise fees - the current fee structure for local audit be revised to ensure that adequate resources are deployed to meet the full extent of local audit requirements
- Move back to a September deadline for Local Authorities - the deadline for publishing audited local authority accounts be revisited with a view to extending it to 30 September from 31 July each year
- Accounts simplification - CIPFA/LASAAC be required to review the statutory accounts to determine whether there is scope to simplify the presentation of local authority accounts.

How you can respond to the Review

One of the recommendations was for local authorities to implement:

The governance arrangements within local authorities be reviewed by local Councils with the purpose of:

- an annual report being submitted to Full Council by the external auditor;
- consideration being given to the appointment of at least one independent member, suitably qualified, to the Audit Committee; and
- formalising the facility for the CEO, Monitoring Officer and Chief Financial Officer (CFO) to meet with the Key Audit Partner at least annually.

Whilst Redmond requires legislation, in practice the second and third bullets are things which authorities could start doing now.

The full report can be obtained from the gov.uk website:

<https://www.gov.uk/government/publications/local-authority-financial-reporting-and-external-audit-independent-review>

MHCLG's response to Sir Tony Redmond's independent review into the effectiveness of external audit and transparency of financial reporting in local authorities was published on 17 December 2020 and can be accessed here:

<https://www.gov.uk/government/publications/local-authority-financial-reporting-and-external-audit-government-response-to-the-redmond-review>

Code of Audit Practice and revised approach to Value for Money audit work - National Audit Office

On 1 April 2020, the National Audit Office introduced a new Code of Audit Practice which comes into effect from audit year 2020/21. The most significant change in the Code is the introduction of a new 'Auditor's Annual Report', which brings together the results of all the auditor's work across the year. The Code also introduced a revised approach to the audit of Value for Money.

Value for Money - Key changes

There are three main changes arising from the NAO's new approach:

- A new set of key criteria, covering governance, financial sustainability and improvements in economy, efficiency and effectiveness
- More extensive reporting, with a requirement on the auditor to produce a commentary on arrangements across all of the key criteria, rather than the current 'reporting by exception' approach
- The replacement of the binary (qualified / unqualified) approach to VfM conclusions, with far more sophisticated judgements on performance, as well as key recommendations on any significant weaknesses in arrangements identified during the audit.

The new approach to VfM re-focuses the work of local auditors to:

- Promote more timely reporting of significant issues to local bodies
- Provide more meaningful and more accessible annual reporting on VfM arrangements issues in key areas
- Provide a sharper focus on reporting in the key areas of financial sustainability, governance, and improving economy, efficiency and effectiveness
- Provide clearer recommendations to help local bodies improve their arrangements.

Implications of the changes

Grant Thornton very much welcomes the changes, which will support auditors in undertaking and reporting on work which is more meaningful, and makes impact with audited bodies and the public. We agree with the move away from a binary conclusion, and with the replacement of the Annual Audit Letter with the new Annual Auditor's Report. The changes will help pave the way for a new relationship between auditors and audited bodies which is based around constructive challenge and a drive for improvement.

The following are the main implications in terms of audit delivery:

- The Auditor's Annual Report will need to be published at the same time as the Auditor's Report on the Financial Statements.
- Where auditors identify weaknesses in Value for Money arrangements, there will be increased reporting requirements on the audit team. We envisage that across the country, auditors will be identifying more significant weaknesses and consequently making an increased number of recommendations (in place of what was a qualified Value for Money conclusion). We will be working closely with the NAO and the other audit firms to ensure consistency of application of the new guidance.
- The new approach will also potentially be more challenging, as well as rewarding, for audited bodies involving discussions at a wider and more strategic level. Both the reporting, and the planning and risk assessment which underpins it, will require more audit time, delivered through a richer skill mix than in previous years.

The Code can be accessed here:

https://www.nao.org.uk/code-audit-practice/wp-content/uploads/sites/29/2020/01/Code_of_audit_practice_2020.pdf

CIPFA – Financial Scrutiny Practice Guide

Produced by the Centre for Public Scrutiny (CfPS) and CIPFA, this guide provides guidance to Councils and Councillors in England on how they might best integrate an awareness of Council finances into the way that overview and scrutiny works.

The impact of the COVID-19 pandemic on Council finances, uncertainty regarding the delayed fair funding review and future operations for social care – on top of a decade of progressively more significant financial constraints – has placed local government in a hugely challenging position.

For the foreseeable future, Council budgeting will be even more about the language of priorities and difficult choices than ever before.

This guide suggests ways to move budget and finance scrutiny beyond set-piece scrutiny 'events' in December and quarterly financial performance scorecards being reported to committee. Effective financial scrutiny is one of the few ways that Councils can assure themselves that their budget is robust and sustainable, and that it intelligently takes into account the needs of residents.

Scrutiny can provide an independent perspective, drawing directly on the insights of local people, and can challenge assumptions and preconceptions. It can also provide a mechanism to ensure an understanding tough choices that Councils are now making.

This paper has been published as the local government sector is seeking to manage the unique set of financial circumstances arising from the COVID-19 pandemic. This has resulted, through the Coronavirus Act 2020 and other legislation, in changes to local authorities' formal duties around financial systems and procedures.

The approaches set out in this guide reflect CfPS and CIPFA's thinking on scrutiny's role on financial matters as things stand, but the preparation for the 2021/22 budget might look different. CfPS has produced a separate guide to assist scrutineers in understanding financial matters during the pandemic

The full report can be obtained from CIPFA's website:

<https://www.cipfa.org/policy-and-guidance/reports/financial-scrutiny-practice-guide>

Revised auditing standard: Auditing Accounting Estimates and Related Disclosures

In the period December 2018 to January 2020 the Financial Reporting Council issued a number of updated International Auditing Standards (ISAs (UK)) which are effective for audits of financial statements for periods beginning on or after 15 December 2019. ISA (UK) 540 (revised): *Auditing Accounting Estimates and Related Disclosures* includes significant enhancements in respect of the audit risk assessment process for accounting estimates.

Introduction

Under ISA (UK) 540 (Revised December 2018) auditors are required to understand and assess an entity's internal controls over accounting estimates, including:

- The nature and extent of oversight and governance over management's financial reporting process relevant to accounting estimates;
- How management identifies the need for and applies specialised skills or knowledge related to accounting estimates;
- How the entity's risk management process identifies and addresses risks relating to accounting estimates;
- The entity's information system as it relates to accounting estimates;
- The entity's control activities in relation to accounting estimates; and
- How management reviews the outcomes of previous accounting estimates.

As part of this process auditors also need to obtain an understanding of the role of those charged with governance, which is particularly important where the estimates have high estimation uncertainty, or require significant judgement.

Specifically do Audit Committee members:

- Understand the characteristics of the methods and models used to make the accounting estimates and the risks related to them;
- Oversee management's process for making accounting estimates, including the use of models, and the monitoring activities undertaken by management; and
- Evaluate how management made the accounting estimates?

Additional information that will be required for our March 2021 audits

To ensure our compliance with this revised auditing standard, we will be requesting further information from management and those charged with governance during our audit for the year ended 31 March 2021 in all areas summarised above for all material accounting estimates that are included in the financial statements.

Based on our knowledge of the Council we have identified the following material accounting estimates for which this is likely to apply:

- Valuations of land and buildings, Council dwellings and investment properties
- Valuation of defined benefit net pension fund liabilities
- Fair value estimates

The Authority's Information systems

In respect of the Authority's information systems we are required to consider how management identifies the methods, assumptions and source data used for each material accounting estimate and the need for any changes to these. This includes how management selects, or designs, the methods, assumptions and data to be used and applies the methods used in the valuations.

When the models used include increased complexity or subjectivity, as is the case for many valuation models, auditors need to understand and assess the controls in place over the models and the data included therein. Where adequate controls are not in place we may need to report this as a significant control deficiency and this could affect the amount of detailed substantive testing required during the audit.

If management has changed the method for making an accounting estimate we will need to fully understand management's rationale for this change. Any unexpected changes are likely to raise the audit risk profile of this accounting estimate and may result in the need for additional audit procedures.

We are aware that the Authority may use management experts in deriving some of its more complex estimates, e.g. asset valuations and pensions liabilities. However, it is important to note that the use of management experts does not diminish the responsibilities of management and those charged with governance to ensure that::

- All accounting estimates and related disclosures included in the financial statements have been prepared in accordance with the requirements of the financial reporting framework, and are materially accurate;
- There are adequate controls in place at the Authority (and where applicable its service provider or management expert) over the models, assumptions and source data used in the preparation of accounting estimates.

Estimation uncertainty

Under ISA (UK) 540 (Revised December 2018) we are required to consider the following:

- How management understands the degree of estimation uncertainty related to each accounting estimate; and
- How management address this estimation uncertainty when selecting their point estimate.

For example, how management identified and considered alternative, methods, assumptions or source data that would be equally valid under the financial reporting framework, and why these alternatives were rejected in favour of the point estimate used.

The revised standard includes increased emphasis on the importance of the financial statement disclosures. Under ISA (UK) 540 (Revised December 2018), auditors are required to assess whether both the accounting estimates themselves and the related disclosures are reasonable.

Where there is a material uncertainty, that is where there is a significant risk of a material change to the estimated carrying value of an asset or liability within the next year, there needs to be additional disclosures. Note that not all material estimates will have a material uncertainty and it is also possible that an estimate that is not material could have a risk of material uncertainty.

Where there is material estimation uncertainty, we would expect the financial statement disclosures to include:

- What the assumptions and uncertainties are;
- How sensitive the assets and liabilities are to those assumptions, and why;
- The expected resolution of the uncertainty and the range of reasonably possible outcomes for the next financial year; and
- An explanation of any changes made to past assumptions if the uncertainty is unresolved.

How can you help

As part of our planning risk assessment procedures we routinely make a number of enquiries of management and those charged with governance, which include general enquiries, fraud risk assessment questions, going concern considerations etc. Responses to these enquiries are completed by management and confirmed by those charged with governance at an Audit Committee meeting. For our 2020/21 audit we will be making additional enquiries on your accounting estimates in a similar way (which will cover the areas highlighted above). We would appreciate a prompt response to these enquiries in due course.

Further information

Further details on the requirements of ISA (UK) 540 (Revised December 2018) can be found in the auditing standard on the Financial Reporting Council's website:
